Large heavy-duty flush terminals:
constructed to allow front and top
connections and fit requirements
on newer popular bikes

Built-in brass nuts:
up to 50% better conductivity
than stainless steel
(GYZ32HL, GYZ20H, GYZ20HL)

Enhanced active material:
compounded to withstand vibration,
prolong battery life and dependability

Absorbed Glass Mat (AGM) separators:
absorb electrolyte, making the
battery nonspillable

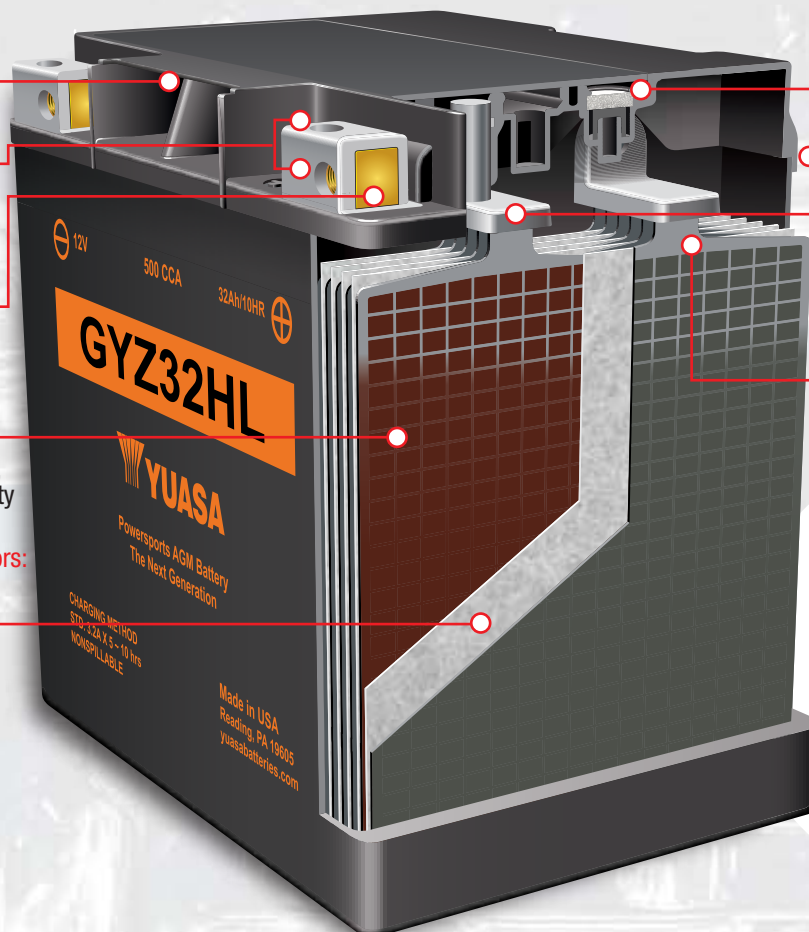

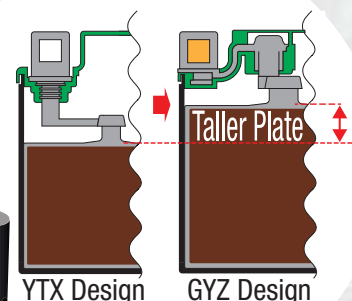

Protective separator material:
enhances vibration resistance

Safety flame-arrestor:
leak proof valve relieves
excess pressure

Heat bonded cover:
eliminates leaks and corrosion

Thru-partition construction:
provides shorter current path
with less resistance than
